

Amendment to the Specification:

Please replace original paragraphs [0007] and [0008] with replacement paragraphs [0007] and [0008] as follows:

[0007] It is thus one object of the invention to provide a molded article having a field of integrally molded hooks thereon wherein the base of the field of the integrally molded hooks has a draft angle ~~greater~~ less than about 45° as the article is withdrawn from the mold.

[0008] It is another object of the invention to provide ~~[[a]]~~ a method and apparatus for making a molded article having a field of hooks on one surface thereof, wherein the base of the field of hooks has a draft angle ~~greater~~ less than about 45° as the direction in which the article is withdrawn from the mold.
